Describe in detail what has happened to the child. What is the abuse or neglect?:

Pt was reportedly riding in a go kart with her Father. She was unrestrained and unhelmeted . The go kart crashed near the family's home

When did the abuse or neglect occur?:

03/31/2020

Does the child have any injuries from the abuse or neglect? If yes, please describe the injuries to the child.:

[REDACTED] is a 25 month old female who presents after a go-cart accident with left neck laceration, profound blood loss, prolonged CPR and now significant neurological injury. Per report patient was riding with dad in a go kart, unrestrained when the go kart flipped multiple times. After it was noted [REDACTED] had profound bleeding and immediately unresponsive. She ultimately required prolonged CPR (estimated > 90 minutes), multiple rounds of epi, multiple blood products with eventual ROSC. She was transported to [REDACTED] ED for further care. At [REDACTED] ED she had a CT head that showed multiple significant injuries - including diffuse subarachnoid hemorrhage, mass effect with sulcal effacement and 3mm leftward midline shift, type II dens fracture, bilateral vertebral artery dissection. NSGY was consulted who felt like given the gravity of injuries surgical intervention would lead to a meaningful recovery. She was then admitted to the PICU and at this time, while parents seem to grasp severity of situation, want to continue with all medical care. Of note, her exam in the PICU has been fairly minimal and upon my assessment she had not gotten sedating medication nor paralytic in at least 5 hours. Neurology is consulted for post arrest EEG and neurological exam. No clear seizure activity has been witnessed.

**Tennessee Department of Children's Services
